-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

BASIS FOR REJECTIONS

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

REJECTION OF CLAIMS OVER PRIOR ART

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by DiFilippo (3,571,888). The claim has been broadly interpreted. In this regard, DiFilippo illustrates in Figures 4-6 press connecting grooves 78 and 81 with different specifications. Shown in Figure 4 is two press fitting grooves 81 (one partially cut away) on a front side of the pliers and a third press fitting groove 78 on the rear of the pliers and opposite to one of the press fitting grooves 81. The third press-fitting groove 78 is opposite to the second press-fitting groove 81. Further as shown in Figure 4 are a left and a right terminal holding seat 82 (one partially cut away). The two terminal holding seats in conjunction with the two press fitting grooves 81 and the third press fitting groove 78 simultaneously press connect "electric communication terminals of three different types" in that three different type of connections are imparted to the two terminals shown in Figures 8 and 9. The press connecting grooves and the terminal holding seats are all constructed as "sheets".

INDICATION OF ALLOWABLE SUBJECT MATTER

Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

PRIOR ART CITED BY EXAMINER

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

RESPONSE BY APPLICANT(S)

Applicant(s) response to be fully responsive and to provide for a clear record must specifically point out how the language of the claims patentably distinguishes them from the references, both those references applied in the objections and rejections and those references cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).
